DCI WEEKLY REPORT
OFFICE OF THE INSPECTOR GENERAL

Inspections:

25X1

NPIC: The NPIC inspection team discovered that NPIC's Analyst Integrated Display Station (AIDS) testbed, or Xerox testbed as it is more commonly called, has been in testing operation without shielding and has been emanating SCI material. As a result, has shut down the test. Jim Taylor has been informed. Our inquiries also indicate that TEMPEST standards and enforcement procedures are not well established across the directorate lines and that a cross-directorate look at the TEMPEST problem should be taken. concurs. I will be discussing follow-on action with the Executive Director.

25X1

Entrance-on-Duty: The EOD inspection has completed its fact gathering and is commencing to pull together its report. My current plan is for the report to be divided into two sections: things that should be done immediately (and there are such things) and goals toward which we should be moving.

COMPTROLLER CHECKLIST

- FY 1983 Appropriation. The Appropriations Committee completed mark-up and reported the FY 1983 Defense Bill. Indications are that for intelligence, the Committee adopted the results of the Intelligence Authorization Conference, with some minor modifications. The House Appropriations Committee is still scheduled to begin their mark-up of the Defense Bill next Wednesday, 28 September. There is still some question, however, whether this will occur.
- Continuing Resolution. The Senate has completed Committee action on their version of an FY 1983 Continuing Appropriation Resolution which sets the levels contained in the recently reported Defense Bill as the benchmark for 1983 operations and allows new starts. A Conference Committee will have to resolve the differences between the two houses; the House version set 1982 funding levels as the benchmark and does not allow new starts.
- FY 1984 Budget. OMB/IC Staff hearings on our FY 1984 budget request will begin next Thursday, 30 September and continue until 15 October. Hearings will include all directorates and concentrate on major ongoing and new initiatives. A number of hearings will also be held on geographic/functional target areas, such as the USSR, Western Europe/ NATO, counterterrorism, etc. On a related matter, we are scheduled to give [redacted] the new IC Staff Director, an overview briefing on the Agency's FY 1984 budget next Tuesday, 28 September.
